

MEDITERRANEO

INDOOR/OUTDOOR CARPET COLLECTION

"This fully recyclable collection relieves nature by enabling countless lifecycles. We wanted to highlight the materiality, the feel and the natural aesthetics with their differentiated color tones. The result is a very robust and weather resistant collection that can be used flexibly both indoors and outdoors," explains Designer Antonio Rodriguez.

The processing of waste into the recyclable MEDITERRANEO collection uses a multi-step approach in which collected, sorted and cleaned waste is turned into polyester chips. Then converted into filament fibers from which the carpet is made.

Compared to the production of carpet from new polyester, this sustainable manufacturing process significantly avoids CO2 emissions. And after its use, MEDITERRANEO can be recycled again and again countless times.

Design CAPRI, Color Sabbia

BY MATTEO THUN & ANTONIO RODRIGUEZ
OBJECT CARPET

The MEDITERRANEO collection includes a variety of 12 designs with four different weave patterns (MILO, RODI, MENORCA and CAPRI) in three different shades (TALCO, SABBIA and VULCANO) that reflect an authentic, natural color palette. As standalone carpet (RUGX), they offer many options for in- and outdoor locations. Despite its robust and natural appearance that is reminiscent of rattan, the carpet is surprisingly smooth.

The quality MILO which represents the smallest and most flat pattern is produced on a loom up to 4m width with textile backing. The other qualities - RODI, MENORCA and CAPRI - instead are limited to 3 m width with a water-permeable finish.

RUGX in standard sizes: ø1,5 m, ø2 m, ø3 m, 1,5x2 m, 2x2 m, 2x3 m, 3x3 m, 3x4 m are usually available within 2 weeks. OBJECT CARPET provides also custommade options on request (4-6 weeks).

BORDER OPTIONS FOR RUGX

The natural character of the collection is emphasized by the unique NATURAL BORDER (see photo). It gets its very special touch through a new type of edging. The sewn edges with open yarn ends reflect the Mediterranean lifestyle and is a special feature that meets even robust outdoor requirements.

Besides the NATURAL BORDER, MEDITERRANEO carpets are also available in TEXTILE BORDER. It frames the RUGX with an exclusive textile band, specially made from the same yarn.

Design RODI, Color Sabbia

MEDITERRANEO carpets are very resilient and the perfect solution for both private and public areas: They are easy to clean, dry quickly and are water- and UV-resistant, so they can easily withstand outdoor conditions.

Matteo Thun emphasizes: "As architects, we were waiting to develop a waste-free and entirely recyclable carpet collection that can also be used outside – The result is a beautifully textured and conscious material that belies its humble origins - we are very happy with it!"
